

## › Internship – Global Supply Chain (w/m/d)

### Working environment

As part of your internship at Audi China in Beijing, you will gain a comprehensive insight into the complex world of global supply chains. China is one of the most important trading partners, a center of innovation for new technologies, a key market for the automotive industry and of crucial importance for the supply of all production sites. The “Supply Chain Greater Asia” department has three core areas of responsibility: Export, Import and Supplier Management. It is primarily responsible for the implementation and optimization of the supply chain from Asia to our customer plants and the resulting cost-efficient supply of our customers' production sites. The establishment and expansion of the international logistics network is carried out in close coordination with the global locations, various AUDI AG departments and external service providers. The focus is on innovative concepts, continuous optimization and future-oriented solutions.

### Responsibilities

- You will support the Supply Chain Greater Asia team in ensuring the supply of our international customers. This activity offers you the opportunity to get to know different aspects and mechanisms of complex global supply chains and project management
- You work independently in different teams and are in direct coordination with the project management to gain different insights.
- You will support the team for the various customers and gain knowledge of the complexity of international logistics processes
- You support the Head of Supply Chain Greater Asia in various strategy topics, as well as in the preparation and creation of documents
- You will independently create and optimize system evaluations as a basis for management reporting

### Qualifications

- You are studying with a focus on logistics, e.g. industrial engineering, business administration or a similar field of study
- You are highly proficient in English and German
- You have advanced MS Office skills
- Ideally, you have already worked with data analysis tools such as Tableau or Power BI
- You are open-minded and a team player and demonstrate a good grasp of complex interrelationships and organizational skills
- You have a high level of independence and are willing to take on challenging tasks independently
- You are resilient and adaptable and are keen to develop yourself further

### Further information

This position is to be filled from 01.08.2025 at AUDI CHINA in Beijing.
